The money this year so far is pretty much the same as it was during the same period last year. The first 5 months of 2010 had the same income as the first five months of 2009, and the same total expenses for maintenance, overhead, activities, and other operating expenses (not including capital expenditures for new equipment). Comparing the first five months of this year to the same five months last year, activities and dayleader wages are down, and maintenance for dinghies and keelboats are up. Hopefully we are ready for the carnage of equipment this summer.

2010-05-21 ExCom Online

Motion passed online: Peter Kuhn moved that CSC not file an insurance claim, and that CSC spend up to \$5,000 to cover the direct cost of repairing the damage to the other boat from collision with a CSC boat on Friday 5/14/10. This expenditure is to be paid from the "Accident Repair" account, which has zero dollars in the current budget. The reason for not filing a claim is to save our insurance in case we incur a much larger loss in the future. We would stand a better chance of being able to get that future claim covered without being cancelled if we have no previous claims. Rob Miller seconded, passed unanimously. (Note: This was an emergency motion since our insurance agent needed to know immediately if we wanted to file a claim. The estimate for the repair was provided 5/19, and was for slightly less than \$5,000, excluding sales tax, with contingency for unseen damage.)
